Technical Skills

Languages and DataBases: Html, Css, Javascript, Typescript, Mongodb, SQL

Libraries and Frameworks: React.js, Next.js, Express.js, Node.js, express.js, Shadcn ui, React Query, Gsap

Other Skills: Git & Github, Api integration, CMS, Artificial Intelligence, ML, MS Office

Experience/Projects

Bytewise Technologies

August 2025 – Present

Lahore, Pakistan

- Developed Bytewise official website using React JS and TypeScript, following a single-repo project structure to ensure maintainability and scalability.
- Implemented clean, modular, and DRY code architecture, improving readability, reducing redundancy, and enabling faster feature development.
- Designed a centralized state management system using Context API and custom hooks, providing predictable data flow across the application.
- Integrated API layer with React Query and Axios, ensuring efficient server state handling, caching, and automatic data synchronization with the UI.
- Built reusable and composable React components with TypeScript, enhancing code quality and enabling seamless UI scaling.
- Developed interactive dashboards and analytics visualizations using React and Chart.js, delivering real-time insights into user activity and site performance.
- Optimized application performance through code-splitting, lazy loading, memoization, and optimized state updates, resulting in faster load times and smoother interactions.
- Ensured responsive and cross-browser compatible design, enhancing accessibility and user engagement across desktop and mobile devices.

Institute of Nuclear Medicine & Oncology Lahore (Inmol IT department)

July 2024 – September 24

Lahore, Pakistan

- Developed and maintained Inmol Hospital Clone website using C#, ASP.NET MVC, and Entity Framework, implementing scalable backend architecture and clean code practices.
- Designed and implemented dynamic web pages using HTML, CSS, JavaScript, and Tailwind CSS, ensuring responsive and user-friendly interfaces.
- Built data-driven features using ADO.NET and Entity Framework with MSSQL, enabling efficient database operations, secure data access, and optimized queries.
- Applied MVC design pattern to separate concerns, improve maintainability, and streamline application workflow between models, views, and controllers.
- Developed interactive and reusable frontend components with Tailwind CSS and JavaScript, improving website UI consistency and user engagement.
- Collaborated on full-stack integration, connecting frontend components with backend APIs and database layers for seamless functionality.
- Ensured code quality, modularity, and reusability across the application, following best practices for maintainable enterprise web applications.

Personal Projects

Gen-AI Interview Studio

- Developed GenAI Interview Studio, a full-stack AI web app that transforms PDF resumes into personalized, day-by-day interview prep plans.
- Analyzes resumes against job descriptions, identifies skill gaps, generates technical & behavioral questions, and provides a structured prep roadmap.
- Built with React.js (frontend), Node.js/Express (backend), MongoDB, and Google Gemini AI.
- Frontend hosted on Vercel, backend on Render for fast performance and reliability.
- Project Link (Frontend): <https://gen-ai-mauve.vercel.app>
- API Link (Backend): <https://gen-ai-7dx.onrender.com/>

Portfolio

- Developed personal portfolio website to showcase projects, skills, and experience with a modern, responsive UI.
- Built using React.js, TypeScript, Tailwind CSS, following clean code and DRY principles.
- Integrated interactive components and smooth navigation to improve user engagement.
- Deployed on Vercel for fast performance and accessibility.
- Project Link: <https://asadali01.vercel.app/>

Ai-Based-Report-Analyzer

- Developed a web application to upload reports and get AI-powered insights and summaries in real-time.
- Built using React.js, integrated AI APIs, focusing on clean UI, responsiveness, and efficient API handling.
- Deployed on Vercel for fast performance.
- Project Link: <https://ai-report-analyzer.vercel.app/>

Image-Enhancer

- Created an AI-powered image enhancer allowing users to upscale and improve clarity of JPG, PNG, and GIF files.
- Tech Stack: React.js, AI APIs, Tailwind CSS, focusing on fast processing and user-friendly UI.
- Designed for photographers, designers, and general users seeking professional-quality visuals.
- Project Link: <https://image-enhancer-sigma-ashy.vercel.app/>

E-commerce Website

- Developed a premium apparel brand website for catalog browsing, product orders, and customizations.
- Tech Stack: wordpress, elementor plugin, emphasizing responsive design, seamless UX, and customer-centric features.
- Focused on quality presentation of products, order management, and interactive UI components.
- Project Link: <https://huskywears.com/>

Education

University of Lahore <i>Bachelor of Science in Information Engineering Technology</i>	Oct 2022 – May 2026 <i>Lahore, Pakistan</i>
Govt Islamiya College Civil Lines <i>Intermediate in FSc</i>	May 2019 – May 2021 <i>Lahore, Pakistan</i>
The Quest School <i>Matriculation</i>	Oct 2017 – May 2019 <i>Lahore, Pakistan</i>

Certificates

Bytewise Technologies <i>Certificate of Internship</i>	Aug 2025 – Jan 2026 <i>Lahore, Pakistan</i>
Frontend Master’s <i>Certificate of Completion</i>	Aug 2025 – Aug 2025 <i>Lahore, Pakistan</i>
Institute of Nuclear Medicine & Oncology Lahore <i>Certificate of Internship</i>	Jun 2024 – Aug 2024 <i>Lahore, Pakistan</i>

Tools & Technologies

- IDE & Editors:** VS Code, Antigravity, Cursor
- DevTools:** Chrome DevTools, React DevTools, React Query DevTools
- API Testing Tools:** Postman, Insomnia
- Hosting & Deployment:** Aws, Render, Vercel, Netlify
- Collaboration & Tools:** Jira, Slack, Hostinger
